

## volatile glass cutting oil DR-206

### 【 Performance and use 】

Dremfu lubricant volatile glass cutting oil DR-206, suitable for all kinds of glass block cutting, with good volatility, lubrication, cooling, and cleaning, and non-toxic, tasteless, very environmentally friendly, no sulfur, chlorine components, biodegradable, no cleaning and other advantages. The cutting is smooth, the cutting mouth is free of debris, the edge is broken neatly, and there is no black edge phenomenon after silver plating, mirror plating and glaze surface.

### 【 Applicable process and material 】

- Suitable for large glass cutting machine all kinds of glass partition, slicing processing oil.
- It is suitable for cutting glass in construction industry, home appliance industry, lighting industry, electronics, instrument industry, transportation and so on

### 【 Advantage 】

1. has good volatility, lubrication, cooling, and cleaning properties
2. non-toxic, tasteless, very environmentally friendly, no sulfur, chlorine, biodegradable, no need to clean
3. smooth cutting, no debris at the cutting edge, neat edge breaking, no black edge after silver plating, mirror plating, glaze

### 【 Main technical parameters 】

item	Technical index	Reference standard
appearance	Colorless and transparent	Visual inspection
Density, (20°C)	0.71 ~ 0.75	hydrometer
Viscosity (40°C, mm <sup>2</sup> /s)	1 ~ 3	GB/T265
Flash point (COC)	> 40 °C	GB/T267
Mechanical impurity	Up to standard	GB/T511

### 【Instruction】

This product does not need to add water, directly add to use.

### 【Packaging and storage】

1. Specifications: 18L/ barrel, 200L/ barrel
2. This product should be stored in a dry, cool and ventilated warehouse, and should be kept away from sun and rain during storage and transportation. Storage temperature -20~35°C.
3. The shelf life is 1 year under normal storage.
