

Ceramic cutting fluid DK-760C5

【 Performance and use 】

Dremfu DK-760C5 water-soluble grinding fluid is prepared by a variety of surfactants, lubricants, anti-rust agents and other additives. Suitable for ceramic material cutting, cutting, grinding, engraving and other cooling processing.

【 Product advantage 】

1. Excellent lubricity, cooling and cleaning.
2. Environmentally friendly and not harmful to skin.
3. Excellent powder sedimentation.
4. not corrupt, long service life.

【 Main technical parameters 】

item	Technical indicators	Technical indicators
External view	Light yellow transparent liquid	Light yellow transparent liquid
pH value	9.5 ± 0.5	9.5 ± 0.5
Defoaming (ml)	2 or less	2 or less
Specific weight (g/ml)	1.10 ± 0.10	1.10 ± 0.10
Surface tension (dyn/cm)	30 or less	30 or less
Storage stability	conjunctive	conjunctive
corrosiveness	Grade A cast iron	Grade A cast iron
Rust resistance	Grade A cast iron	Grade A cast iron

【 Instruction 】

The working liquid is diluted with 10-20 times tap water or deionized water.

During use, the working liquid consumed can be supplemented at a concentration of 3-5%.

Avoid mixing with other oils.

【Packaging】

18L/ barrel, 25L/ barrel, 200L/ barrel.

【Note】

1. This product should not be mixed with other emulsions, semi-synthetic liquids, and fully synthetic liquids, because even if the system contains a small amount of rotten residual liquid, it will affect the use effect of the new liquid.

2.the production batch is not the same, the cutting fluid may have color differences, does not affect the normal use.
