

Ant-909 volatile anti-rust oil

【Product Performance】

Ant-909 volatile anti-rust oil is prepared by adding a variety of anti-rust agents with environmentally friendly solvent as the carrier. The anti-rust oil will evaporate quickly, leaving a thin soft film on the metal surface, which is easy to remove in use. The oil has excellent rust resistance and salt spray resistance to ferrous metals, mainly used for rust prevention between processes, and the rust prevention cycle is generally more than half a year.

【product parameters】

project	Typical data	Test method
Appearance	Yellow transparent	Visual inspection
density (20°C)	0.78~0.83	hydrometer
Kinematic viscosity 40°C (mm ² /s)	3~8	GB/T 265
Flash point (°C)	>40°C	GB/T 267
Mechanical impurities	Qualified	GB/T 511

【Performance characteristics】

- ★ Excellent versatility, suitable for all metals;
- ★ Quickly drain water, strong anti-rust;
- ★ A thin soft film is left after volatilization, which does not affect the accuracy requirements of the assembly process of processed parts;
- ★ Aroma, easy to clean.

【Range of application】

- Suitable for all carbon steel, copper, aluminum, stainless iron and other metal materials rust prevention.

【usage method】

Can soak, brush, spray

【packaging specifications】

18L/ plastic bucket, 200L/ large iron bucket.
