

Ant-939 volatile anti-rust oil

【Product Performance】

Ant-939 volatile hard film anti-rust oil is formulated with eco-friendly solvents as the base oil and various environmentally friendly additives, antioxidants, and anti-rust agents. It can be applied by dipping, brushing, or spraying onto metal surfaces that require rust protection. After drying, it forms a golden hard film on the metal surface that is non-sticky, providing long-term protection against corrosion and rust.

【product parameters】

project	Typical data	Test method
Appearance	Yellow transparent	Visual inspection
density (20°C)	0.78~0.83	hydrometer
Kinematic viscosity 40°C (mm ² /s)	3~10	GB/T 265
Flash point (°C)	>40°C	GB/T 267
Mechanical impurities	ellow transparent	GB/T 511

【Performance characteristics】

- ★ Excellent versatility, suitable for all metals;
- ★ Quickly drain water, strong anti-rust;
- ★ After volatilization, golden hard film is formed, and the rust prevention time can reach 1-3 years;
- ★ Aroma, can do long-term rust prevention.

【Range of application】

Suitable for high-requirement metal surfaces that do not need subsequent treatment for long-term rust prevention. The anti-rust principle involves dipping or applying the anti-rust oil to the workpiece, after which the oil evaporates, leaving a transparent, non-sticky anti-rust film on the surface for long-term protection. Before applying the oil, ensure that the workpiece surface is clean and free of oil and dirt.

【usage method】

Can soak, brush, spray.

【packaging specifications 】

18L/ plastic bucket, 200L/ large iron bucket.
