

Optical glass degumming agent TJ-02

【Performance and use】

Optical glass degumming agent TJ-02 is composed of a variety of organic solvents and surfactants. This product is mainly suitable for all kinds of OP glue, UV glue, thermosetting glue, room temperature curing glue removal

【Product Features】

1. Safety and environmental protection/This product is non-combustible, non-explosive, non-volatile, non-toxic, safe to use, no pollution to the environment.
2. Fast and efficient/strong penetration, fast dissolution and stripping of colloidal materials, and can handle large quantities of workpieces at one time; This product will not cause damage to the joint gap during cleaning, and there is no damage to the surface of the workpiece.
3. Durable stability/This product is an organic solvent with good stability and long service life.

【Main technical parameters】

The name of a product or commodity	Technical index	Technical index
PH value	7.9-8.2	7.9-8.2
Density 15°C g/cm ³	1.12	1.12
appearance	Light yellow transparent liquid	Light yellow transparent liquid
Boiling point	123	123

【Instruction】

Containers can be selected stainless steel containers, container size depends on production. Add the product into the container, put it into the lens, soak at room temperature or warm, depending on the type of gel on the surface of the workpiece and the degree of hardening to control the soaking time and temperature.

1. Replenish the stock liquid at any time during the operation according to the production situation.
2. Replace the solution after depth change in color.

【Packaging】

25L/ barrel
